Dragon Tail Plant

Rhaphidophora decursiva

Height: 10 feet

Spread: 4 feet

Sunlight: ◐ ●

Hardiness Zone: 10b

Description:

This fast growing features deep green, glossy foliage; allow it to cascade or trail from hanging baskets or in planters up high, or train on a trellis or moss pole; a lovely, easy to grow and low maintenance selection, perfect for houseplant collections

Features & Attributes

Dragon Tail Plant's attractive glossy lobed leaves emerge light green, turning dark green in color throughout the year on a plant with a spreading habit of growth.

This is an herbaceous evergreen houseplant with a spreading, ground-hugging habit of growth. Its relatively coarse texture stands it apart from other indoor plants with finer foliage. This plant can be pruned at any time to keep it looking its best.

Planting & Growing

When grown indoors, Dragon Tail Plant can be expected to grow to be about 10 feet tall at maturity, with a spread of 4 feet. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It does best in average to evenly moist soil, but will not tolerate standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
