Cracklin Golden Yellow Chrysanthemum

Chrysanthemum 'Cracklin Golden Yellow'

Cracklin Golden Yellow Chrysanthemum flowers

Height: 24 inches

Spread: 30 inches

Sunlight: ○ ◐

Hardiness Zone: 6a

Other Names: Garden Mum

Description:

Flowers start off a fiery gold with reddish hues, fading to rich yellow, above deep green foliage; well suited for late summer and fall containers and landscapes; free branching with strong, flexible stems; low maintenance

Ornamental Features

Cracklin Golden Yellow Chrysanthemum is covered in stunning double gold daisy flowers with coppery-bronze overtones at the ends of the stems from late summer to late fall. The flowers are excellent for cutting. Its fragrant ferny leaves remain dark green in color throughout the season.

Landscape Attributes

Cracklin Golden Yellow Chrysanthemum is an herbaceous perennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Cracklin Golden Yellow Chrysanthemum is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Cracklin Golden Yellow Chrysanthemum will grow to be about 24 inches tall at maturity, with a spread of 30 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Cracklin Golden Yellow Chrysanthemum is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, this plant may be too tender to survive the winter if left outdoors in a container. Contact our experts for more information on how to protect it over the winter months.
